

FlagStone

Ideal for decks, patios, sidewalks and pool surrounds

Our newest pavingstone! **FlagStone** consists of six identically shaped pavers, each with its own unique pattern, in six beautiful color blends that easily fit together to create an authentic look of natural flagstone at a fraction of the cost. This paver is installed in the same way as our other pavers, however, FlagStone requires the application of a Polymeric Joint Sand to fill the joints.

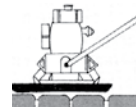

Dimensions: 19-3/4"x15"x 2-3/8" Actual area of each piece: 1.5 sq ft

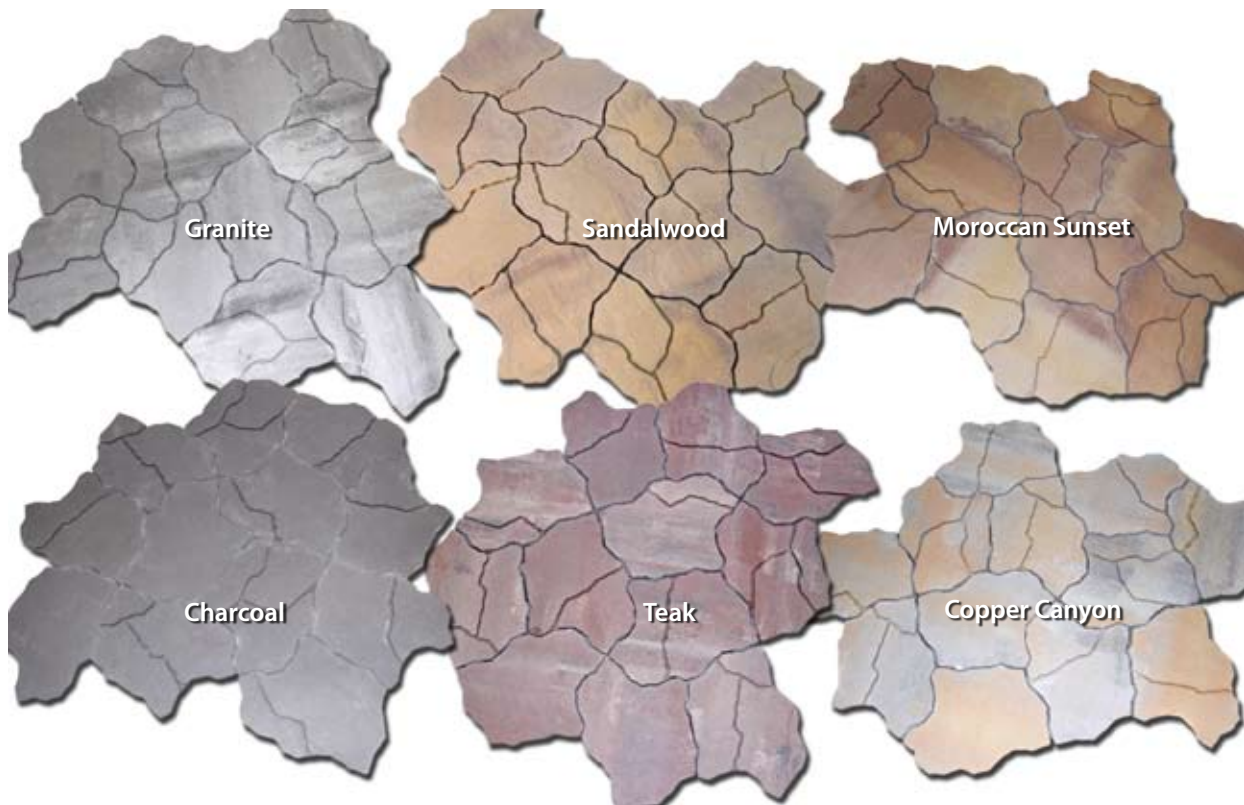

Techni-Seal RG+
Polymeric Joint Sand

Note: Due to this paver's unique profile, a special mat is required to be placed on the bottom of the compactor. Please contact your dealer for complete details.

Not recommended for vehicle applications

We strongly recommend using the Techni-Seal RG+ Polymeric Joint Sand, which is especially designed for use with the FlagStone's wider joint. Regardless of the polymeric joint sand used, it is critical that you follow the manufacturer's specific application instructions to ensure a successful installation. Please consult your Abbotsford Concrete dealer for full details.
