**Accessories**

- BJ Spacer Tabs 3mm
- BJ Joist Holder
- BJ Top Slope Corrector
The BlackJack Adjustable Pedestal system is a new generation Screw Jack pedestal engineered to provide a versatile and sustainable cost effective solution to support raised slabs and timber decking on uneven surfaces. It provides a cavity to conceal services, improves both heat and sound insulation, also facilitates rapid surface drainage while allowing waterproofing and services to remain accessible. This suspended system aids in the reduction of efflorescence and algae growth.

**BlackJack** is a height and slope adjustable pedestal for slab and decking support, engineered to reduce material, construction and lifecycle costs. It caters to a wide range of height requirements, from $2\frac{7}{8} - 40''$ (74mm - 1016mm), using only three main components (Top, Coupler and Base). Accessories include top slope-correctors, spacer tabs, couplers and joist holders.

**High Compressive Strength**
BlackJack has high ultimate compressive strength for various height combinations.

**Supports Green Building**
BlackJack is manufactured from recycled polypropylene, LEED points available.

**Advantages**
- Easy to install and lightweight
- Progressive height increments
- Top slope correction
- Easily removed and reused
- Made from recycled polypropylene
- LEED points available

**Construction Benefits**
BlackJack provides a quick to install alternative to on-site fabricated concrete or metal piers.

It allows convenient progressive height adjustments and correction for fall. Desired height is secured with integrated Locking Rings.

The large flat base and rounded edges do not penetrate and compromise waterproofing membranes. The base flange design prevents water ponding and breeding of pests.

Unique BlackJack Turning Tool (pictured below) connected to a power drill permits height adjustments to be made with minimum effort. Available from your Abbotsford Concrete Representative.
Distinctive Features

Top Slope Corrector
Top Slope Correctors provide for slope compensation up to 5%, keeping slabs level on a sloping surface.

Locking Ring
Locking Rings ensure pedestals are secured at desired heights and are easily removed when not required.

Spacer Tab
Spacer Tab height 5/8” (15mm) with a thickness of 1/8” (3mm) between slabs.

Joist Holder
Joist Holders accommodate joist width from 1 3/8” to 3 1/2” (35mm - 80mm) to keep joists firmly in place on pedestals.
